4" Engine Driven Trash Pump

3" Engine Driven Trash Pump

AMT Engine Driven Trash pumps are designed for applications which require high flow efficiency and solid handling capability. These pumps are constructed of heavy duty sand cast aluminum components featuring removeable/replaceable cast iron volutes, impellers and wearplates. Simple cleanout design permits easy removal of trash and debris without disconnecting hoses. Cast iron discharge port rotates in 90° increments. An electric start option is available on many models.
