Bronze Circulator Pump

AMT Inline Circulator Pumps are designed for continuous duty industrial/ commercial systems. Pumps are available in a variety of material configurations to meet your specifications. All models are powered by a single phase 115 VAC ODP 56J NEMA frame 1/4 HP electric motor with 1/2-14 NPSM conduit connection. Direct coupled design eliminates stub shaft, oiled bearing and coupling, reducing maintenance. Pumps are interchangeable with other manufacturers, see cross reference on specification page.

* Maximum temperature applies to water only.
